

1. Name the process of growing crops. → Agriculture
2. What is the practice of growing two or more crops in the same field? → Cropping
3. Name the tool traditionally used for tilling soil. → Plough
4. Which crop is grown in the rainy season? → Paddy
5. Which method is used for sowing seeds with a tractor? → Seed drill
6. Name one Kharif crop. → Maize
7. Name one Rabi crop. → Wheat
8. What is the process of cutting and gathering crops? → Harvesting
9. Name a natural method of irrigation. → Moat
10. Which instrument is used to sprinkle fertilizers? → Sprayer
11. What is the unwanted plant in the field called? → Weed
12. What is used to remove weeds? → Hoe
13. Name one modern method of irrigation. → Sprinkler
14. Name one traditional method of irrigation. → Chain pump
15. Which machine is used for harvesting? → Combine
16. What is the process of separating grains from chaff? → Winnowing
17. Which process involves loosening the soil? → Tilling
18. What is added to soil to increase its fertility? → Manure
19. Name one chemical fertilizer. → Urea
20. What is the process of preserving grain in jute bags? → Storage
21. Who provides food to the plant? → Root
22. What is the use of manure? → Fertilization
23. What type of soil is best for growing wheat? → Loamy
24. What is the removal of weeds called? → Weeding
25. Which tool is used to level the soil? → Leveller
26. What is the uppermost fertile layer of soil called? → Topsoil
27. Name the bacteria that fix nitrogen in legumes. → Rhizobium
28. What is mixed with soil before sowing? → Manure
29. Name a process used to improve soil structure. → Ploughing
30. Which system of irrigation saves water? → Drip
31. Tool used for loosening soil and removing weeds? → Hoe
32. Traditional irrigation method using a pulley system? → Moat
33. Which crop is first grown in nurseries before being transplanted? → Paddy
34. Which organ of the plant absorbs water and nutrients? → Root
35. Main nutrient replenished by growing legumes? → Nitrogen
36. Which season do we grow mustard and wheat in? → Winter
37. The solid waste from animals used as organic manure? → Dung
38. Which element is most common in chemical fertilizers? → Nitrogen
39. The process of allowing manure to decompose before use? → Composting
40. Microorganisms that decompose organic matter? → Bacteria
41. Device that helps cover seeds with soil after sowing? → Seed drill
42. What is the function of Rhizobium bacteria? → Fixation
43. What increases soil porosity and aeration naturally? → Earthworms
44. Storage structure used by small farmers? → Bin
45. Agricultural machine pulled by a tractor for tilling? → Cultivator
46. What is the full form of NPK in fertilizers? → Nutrients
47. The season when maize and cotton are grown? → Kharif
48. Crop cutting festival celebrated in Punjab? → Baisakhi
49. Undesirable plants competing with crops for resources? → Weeds
50. Name of the lever-based traditional irrigation tool? → Rahat
